

"I have a dream" Speech

By an Academy 1st Grader

I have a dream that everyone will have food, warmth, clothes and shelter. I care for all diseases such as bronchitis, pneumonia, the list goes on and on. That's why I like when we donate things to charity. I want everyone to be happy just like God does. I hope everybody has everything they need. My heart is loving to those who have children, wives and husbands, but they need all the things we have, for instance, blankets. We have those things and some people don't have that much. We should be thoughtful to those people. I am one of those who are nice to people I don't know. I will give more things to those people. Almost everyone is like us. But some people don't have anything. Some people may have a sweater or two, but that's not enough. I would care even if I was too old to have a loving heart. I would always care. That is my dream.
