

Dear Mission Control (Parents and Community),

The intermittent external storms continuously pass over, but it hasn't dampened the enthusiasm of our young cadets. There has been rigorous training on the multi-axis trainer, the 1/6 chair, and the manned maneuvering unit. The highlight of the Space Academy experience is performing two missions in space. We are happy to report that no trainee was left out in space, but....

We are very proud of our students' accomplishments and hard work. They have developed new skills and in many ways have matured through their experiences here at Space Academy. We know they are ready to graduate with honors on Friday morning.

Our buses will probably encounter rain on the way home on Friday. We will have the children start calling when we are about an hour or less from the school. The phone tree should begin at that time as well. Even if your child has a cell phone, please continue with the phone tree because there are children who do not have cell phones with them.

It is important that all arrive **ON TIME or EARLY** to pick up the children. Please **do not be late** and make the children wait for you. It has been a long day for them and they wish to share their experiences. We need everyone to **park in the Kenmore** lots so the buses can pull safely into the Sheridan lot.

Thank you for all of your support and encouragement. Without everyone working together, our trip would not be successful.

Signing off until our safe return,

Space Station Scientists: Fowler, Lampic, Pond, Dahlen, & East
